

Your Flowers-We need your help!

We Need your Help!....

It's very important that you make sure that your flowers are where they are needed.

The perfect time for some creative photographs of you and your bridesmaids and some details is when you are getting ready and just before you leave for the ceremony.

If you are getting ready at your home, your parents' home or your hotel, it is important to have your flowers and your bridesmaids' flowers delivered to you there, not delivered to the church with all the other flowers.

Most florists don't like to do this, because they will have to make two deliveries, one for you and one for your church, but they will do it, usually at no additional charge, if you are firm and insist on it. Just tell them that you need your flowers for your photographs, but if you don't tell them, and insist, they will deliver everything to the church.

By delivering them to you before the ceremony, we will be able to get some wonderful detail shots, ring shots, your shoes/veil/flowers/rings etc. shots, some bridal and some of you with your bridesmaids, as well as with your limo. Your flowers will be at their very freshest, and look their very best for these close-up detailed shots. Otherwise if they are delivered to the church, there will not be time to get all these shots once you get to the church, and after the ceremony, there isn't usually much time, not to mention that your flowers will not be at their freshest.

As far as the groom and guys, if they are going to be finishing getting ready at the church, then by all means, have theirs delivered to the church. Please be sure to ask that they wait to pin their flowers on until we arrive at the church, so that we will be able to get shots of them being pinned on. Please be sure to let us know where this will take place.

If you have any questions, please don't hesitate to ask
