FABRICUT

Sky, earth, water, fire. The elements of nature lit San Francisco designer Kendall Wilkinson's creative wick when she pulled out the drawing board to create her inaugural collection of fabrics for Fabricut. Ideal for use both indoors and out, the fabrics come in colors ranging from vivid hues such as sky blue, lime green, and orange to ethereal neutrals. The textiles focus on two themes—one an organic and loose aesthetic and the other a formal, geometric vibe. (fabricut.com) —K.R.
